He had the range of the house and his favorite place was in my wite's boudoir. My last child was then hardly out of babyhood—in the semi-crawling, toddling stage. She was always brought down to the boudoir every evening at 5.

One evening the dog was as usual on the rug in front of the fire, the child being seated in another part of the room. A sudden cry from my wife made me look up and I saw to my horror the child had crawled close up to the dog.

One glance showed me there was no time to interfere, as by doing so the dog might bite. By the time the baby had got up to the dog he was pulling his ears and had one of its little arms right in his mouth. All the dog did was to lick the little one's face and permit it to tug away at its pleasure. Almost the first word that child learned was the name of the dog, which was Flink.

From that day the dog was a daily visitor to the nursery, and never let the childern go out without his escort, and it is needless to say that no stranger was permitted to come near them. Though Flink liked the other children he was always devoted specially to the baby.
